

Sector	Sub-sector	Geographic area	Component	Present Situation Sp	Target Situation St	Projects ΔS		Characteristics										Priority
								Technical Constraints			Cost					Impact	Uncertainty (High, Medium, Low)	
								Description	Min. delay to start (Year)	Min. constr. period (Year)	Investment Million US\$	Land value / expro (a')	Yearly maintenance cost (b) %	Major rehab/replac. cost (c) %	Span for rehab/replc (d)			
			Major rehab/replac. cost (c) Span for rehab/replc (d) Yearly operation cost % (e)	4%	4%													
			Performance Indicators: Results Despite the high internet penetration factor, the wireline penetration factor is not progressing and is kept almost stagnant. Private providers are big players in the broadband network for residential and business market and have the biggest stake of marketshare for such services.															
			Means lack of regulations and strategy for open market and economy of scale for internet and e-business. Network elements are reliable but neither efficient nor upgraded for evolving service offerings.
